

1/1

TABLE 1

**Fig. 1 Effect on sciatic nerve ligature**

8 rats/group; mean  $\pm$  SEM; \* $p$  < 0.05 vs. control, ANOVA followed by Dunnett's test  
 Pain threshold of normal animals of equal weight/age =  $42.2 \pm 2.88$  g

**Fig. 2 Effect on diabetic neuropathy**

8 rats/group; mean  $\pm$  SEM; \* $p$  < 0.05 vs. control, ANOVA followed by Dunnett's test  
 Pain threshold of normal animals of equal weight/age =  $245.0 \pm 3.16$  g
